BOATHOUSES

practically cry out for the Shore Tracker. Replace that dangerous, old, home-made system with safety and reliability. Whether you are building a new boathouse or adding a garage to your house, we've got the solution.

LAND CANOPIES

are a great alternative to a boathouse or boat lift. The canopy legs are screwed into the ground, providing incredible hold in high winds.

PONTOONS

are supported with 12-foot, full length bunks. Much better than a boat lift!

SEAPLANES

can be secured to solid ground instead of remaining tied to a dock.

40 YEARS
OF
EXPERIENCE
BEHIND
OUR DESIGN

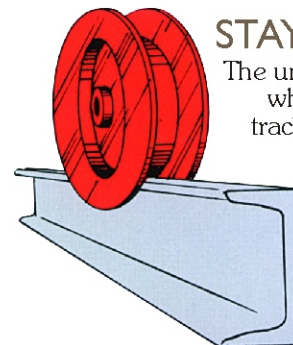

NO MORE PUSHING

The two-way winch pulls your boat in both directions. The standard electric brake holds securely and prevents coasting.

STAY ON TRACK

The unique double-flanged wheel provides smooth tracking and assures that the carriage stays on the track.

IDEAL FOR ANY WATERCRAFT

The Shore Tracker easily adapts to fishing boats, wakeboard boats, wood boats, pontoons, or seaplanes.

ANTIQUE WOODEN BOATS are secured from the elements.

*Protect Your Investments
with a*

Shore Tracker[®]

The Shore Tracker has been designed to give you many years of trouble-free service. The standard 5000 lb. capacity system is strong enough to handle many types of boats, and custom systems are available for larger boats or unusual hull types.

IMAGINE THE CONVENIENCE

Having your boat on land makes it easy to maintain. Think how easy it will be to clean, wax, cover, change props, and more!

VALUE IN SO MANY WAYS

Winter boat storage costs can be eliminated and you won't need a trailer. It also adds value to your property...home buyers love it!

INNOVATION
RELIABILITY
CONVENIENCE

Shore Tracker[®]
Marine Railway System
gets your boat completely out of
the water. No worries about
fluctuating water levels, stormy
weather, high winds, or big waves
that could damage a boat and lift.
